M model
ME model
4 hydroxyphenylacetate catabolism (num rxns = 7)
Alanine and Aspartate Metabolism (num rxns = 9)
Alginate biosynthesis (num rxns = 3)
Alternate Carbon Metabolism (num rxns = 80)
Amine and Polyamine Metabolism (num rxns = 23)
Amino Acid Metabolism (num rxns = 2)
Aminoacyl-tRNA Biosynthesis (num rxns = 48)
Arginine and Proline Metabolism (num rxns = 38)
Aromatic Compound Degradation (num rxns = 19)
Benzoate Metabolism (num rxns = 9)
Butanoate metabolism (num rxns = 98)
Cell Envelope Biosynthesis (num rxns = 111)
Citrate cycle (TCA cycle) (num rxns = 12)
Cofactor and Prosthetic Group Biosynthesis (num rxns = 126)
Cofactor and Prosthetic Group Biosynthesis (num rxns = 17)
Cofactor and Prosthetic Group Biosynthesis (num rxns = 13)
Cofactor and Prosthetic Group Biosynthesis Folate Metabolism (num rxns = 3)
Cofactor and Prosthetic Group Biosynthesis Porphyrin and Chlorophyll Metabolism (num rxns = 9)
Cofactor and Prosthetic Group Biosynthesis Riboflavin Metabolism (num rxns = 7)
Cysteine Metabolism (num rxns = 16)
Exchange (num rxns = 1)
Fatty Acid Metabolism (num rxns = 18)
Fatty Acid Synthesis (num rxns = 1)
Folate biosynthesis (num rxns = 2)
Fructose and mannose metabolism (num rxns = 110)
Glycerophospholipid Metabolism (num rxns = 7)
Glycolysis/Gluconeogenesis (num rxns = 14)
Histidine metabolism (num rxns = 8)
Iron uptake and metabolism (num rxns = 8)
Lysine Metabolism (num rxns = 39)
Membrane Lipid Metabolism (num rxns = 3)
Methylglyoxal Metabolism (num rxns = 15)
Murein Biosynthesis (num rxns = 30)
Murein Recycling (num rxns = 34)
Nicotinate and nicotinamide metabolism (num rxns = 17)
Nucleotide Salvage Pathway (num rxns = 9)
Pentose Phosphate Pathway (num rxns = 2)
Porphyrin and chlorophyll metabolism (num rxns = 1)
Propanoate metabolism (num rxns = 23)
Purine and Pyrimidine Biosynthesis (num rxns = 3)
Riboflavin Metabolism (num rxns = 5)
Starch and Sucrose Metabolism (num rxns = 12)
Threonine and Lysine Metabolism (num rxns = 17)
Transport, Inner Membrane (num rxns = 181)
Transport, Outer Membrane (num rxns = 31)
Tyrosine, Tryptophan, and Phenylalanine Metabolism (num rxns = 21)
Ubiquinone Biosynthesis (num rxns = 23)
Valine, Leucine, and Isoleucine Metabolism (num rxns = 30)
none (num rxns = 1)
tRNA Charging (num rxns = 1)
