M model
ME model
Alanine and Aspartate Metabolism
Alternate Carbon Metabolism
Amine and Polyamine Metabolism
Aminoacyl-tRNA biosynthesis
Aminophosphonate metabolism
Arginine and Proline Metabolism
Benzoate degradation
Cell Envelope Biosynthesis
Cofactor and Prosthetic Group Biosynthesis
Cofactor and Prosthetic Group Biosynthesis Fe Cluster metabolism
Cofactor and Prosthetic Group Biosynthesis Folate Biosynthesis
Cofactor and Prosthetic Group Biosynthesis Porphyrin and Chlorophyll Metabolism
Cofactor and Prosthetic Group Biosynthesis Queuosine biosynthesis
Cofactor and Prosthetic Group Biosynthesis Ubiquinone biosynthesis
Cofactor and Prosthetic Group Metabolism
Cysteine Metabolism
Fatty Acid biosynthesis
Folate biosynthesis
Glutamate Metabolism
Glycerophospholipid Metabolism
Glycine, serine and threonine metabolism
Glycolysis/Gluconeogenesis
Glyoxylate Metabolism
Heavy Metal Tolerance
Histidine metabolism
Iron uptake and metabolism
Membrane Lipid Metabolism
Murein Biosynthesis
Murein Recycling
NAD Metabolism
Nicotinate and nicotinamide Metabolism
Nucleotide Metabolism
PHA Metabolism
Pentose Phosphate Pathway
Porphyrin and Chlorophyll metabolism
Propanoate metabolism
Purine and Pyrimidine Biosynthesis
Riboflavin Metabolism
Threonine and Lysine Metabolism
Transport
Transport ABC system
Transport, Inner Membrane
Tyrosine metabolism
Tyrosine, Tryptophan, and Phenylalanine Metabolism
Ubiquinone biosynthesis
Urea cycle and metabolism of amino groups
Valine, Leucine, and Isoleucine Metabolism
none
tRNA Charging
Pathways
