M model
ME model
4 hydroxyphenylacetate catabolism
Alanine and Aspartate Metabolism
Alginate biosynthesis
Alternate Carbon Metabolism
Amine and Polyamine Metabolism
Arginine and Proline Metabolism
Aromatic Compound Degradation
Aromatic Acid Breakdown
Benzoate degradation
Butanoate metabolism
Cell Envelope Biosynthesis
Cell Envelope Biosynthesis, Lipid A Biosynthesis
Citrate cycle (TCA cycle)
Cofactor and Prosthetic Group Biosynthesis
Cofactor and Prosthetic Group Biosynthesis, Fe Cluster
Cofactor and Prosthetic Group Biosynthesis, Folate Biosynthesis
Cofactor and Prosthetic Group Biosynthesis Porphyrin and Chlorophyll Metabolism
Cysteine Metabolism
Exchange
Fatty Acid Metabolism
Fatty Acid Synthesis
Folate biosynthesis
Fructose and mannose metabolism
Glycerophospholipid Metabolism
Glycolysis/Gluconeogenesis
Glyoxylate Metabolism
Histidine metabolism
Iron uptake and metabolism
Lysine degradation
Lysine, Lipid Biosynthesis
Membrane Metabolism
Murein Biosynthesis
Murein Recycling
Nicotinate and nicotinamide metabolism
Nucleotide Metabolism
PHA Metabolism
Pentose Phosphate Pathway
Purine and Pyrimidine Biosynthesis
Riboflavin metabolism
Starch and Sucrose Metabolism
Threonine and Lysine Metabolism
Transport
Transport, Inner Membrane
Transport, Outer Membrane
Tyrosine metabolism
Tyrosine, Tryptophan, and Phenylalanine Metabolism
Ubiquinone biosynthesis
Valine, Leucine, and Isoleucine Metabolism
none
Pathways
