M model
ME model
Alanine and Aspartate Metabolism
Alternate Carbon Metabolism
Amine and Polyamine Metabolism
Aminoacyl-tRNA biosynthesis
Arginine and Proline Metabolism
Aromatic Compound Degradation
Benzoate degradation
Butanoate metabolism
Cell Envelope Biosynthesis
Cell Envelope Biosynthesis Lipid A Biosynthesis
Citrate cycle (TCA cycle)
Cofactor and Prosthetic Group Biosynthesis
Cofactor and Prosthetic Group Biosynthesis Biotin Biosynthesis
Cofactor and Prosthetic Group Biosynthesis Fecluster metabolism
Cofactor and Prosthetic Group Biosynthesis Porphyrin and Chlorophyll Metabolism
Cofactor and Prosthetic Group Biosynthesis Ubiquinone biosynthesis
Cofactor and Prosthetic Group Metabolism
Cysteine Metabolism
Exchange
Folate biosynthesis
Glutamate Metabolism
Glycerophospholipid Metabolism
Glycolysis/Gluconeogenesis
Glyoxylate Metabolism
Iron uptake and metabolism
Membrane Lipid Metabolism
Methylglyoxal Metabolism
Murein Biosynthesis
Murein Recycling
Nicotinate and nicotinamide metabolism
Nucleotide Metabolism
One carbon pool by folate
PHAMetabolism
Pentose Phosphate Pathway
Porphyrin and chlorophyll metabolism
Propanoate metabolism
Purine and Pyrimidine Biosynthesis
Riboflavin metabolism
Threonine and Lysine Metabolism
Transport
Transport, Outer Membrane
Tyrosine, Tryptophan, and Phenylalanine Metabolism
Ubiquinone biosynthesis
Urea cycle and metabolism of amino groups
Valine, Leucine, and Isoleucine Metabolism
none
Pathways
